

# Slide Doors

LINEAR DRIVE • BELT DRIVE • MANUAL ICU SYSTEMS

Horton Automatics offers the broadest line of sliding doors in the industry. Every door package is custom manufactured to your specifications.

## Innovative Features and Economical Performance

Invented by Horton Automatics, we carry on our proud slide door tradition with the broadest product offering in the industry. Our broad offering gives you and your design partners “choices” so that your entrances meet your exacting requirements for size, color, and finish as well as function, grade of construction, safety and security. Horton Automatics is always available to assist you with your “choice” to insure all your design, architectural and code requirements are met.

**Profiler™** – Premium automatic entrance system featuring diagnostic microprocessor control, Horton’s exclusive linear drive slim (low profile) header system and premium corner block construction in all doors and panels – Horton’s low cost of ownership leader.

**ProSlide™** – Premium automatic entrance system featuring diagnostic microprocessor control and belt drive header system. The ProSlide’s doors and panels feature premium corner block construction. This system is designed to provide long life and safe operation with heavier doors.

**ProSlide™ Telescoping** – Designed with premium door panel construction. The Telescoping door provides maximum opening when space is limited.

**Elegant™** – All glass panel automatic entrance system featuring diagnostic microprocessor control and heavy-duty belt drive header system. High visibility in looks and functions.

**ProfilerICU™** – Industry leading manual entrance system featuring a low profile header along with positive latch locking system and super strong breakouts makes this a favorite for hospitals or any application where a manual slide door that can swing out is needed. S-rated designs are also available.

**ProfilerStorm™** – The widest range of automatic slide entrance systems that meet the exacting specifications to maintain an entrance’s integrity in hurricane force winds. Miami Dade approved.

**HD-Slide™** – Heavy duty automatic entrance system featuring upgraded belt drive system in a heavy-duty header. This system can handle door panels weighing up to 500 pounds.

Horton Automatics has the largest distribution team in the industry to support your slide entrance needs. All of our distribution partners are factory trained and certified to assure your entrance system is expertly installed, interfaces with your key building systems and is properly maintained.
